

TRAP CATCH TRACKING

SET THE TRAP

- If you need advice on what the best bait is to use in the trap just pop us an email. Bait type depends on the type of trap & the time of year.
- We can also help with tips on the best place to place a trap depending on what pest animal you are targeting.
- Please use gloves when handling a trap.

RECORD YOUR CATCH

Each time you catch something, simply scan the QR code with your phone camera to access the online catch form.

Then enter the trap number (from the tag attached to the trap) & catch details on the form and click 'submit'. No login is required.

TRAP NUMBER

If you need more traps just let us know - we are happy to expand our trapping network in the area - every trap counts!

It's important for us to track the number of pests we are trapping as this support our funding applications & helps us improve our trapping programme.
